

ACCESS 2USB Wi-Fi Setup for 4.0 firmware and newer

- 1. Insert a supported USB Wi-Fi adapter (such as a Edimax EW-7811UAC).
- Go to Network->Manage Networks and select the appropriate WLAN Adapter entry. (If you do not see an appropriate icon, please contact our tech support department for assistance techies@comrex.com)

- If the entry displays a red X over the icon, press the **Enable** button on the right-hand side of the screen
- Press the **Configure** button on the right-hand side of the screen. Select the **Scan** tab and press the **Scan** button near the bottom of the screen. This action will take a few moments to populate a list of the local hotspots.

5. You can now select your desired hotspot and press the **Create Location** button.

10. Press **Apply**.

- 11. You will be brought back to the main network screen and the adapter will negotiate with the hotspot to acquire a current IP address. This may take a few moments.
- Once an IP address displays near the bottom of the screen, you can then navigate to **Remotes->Manage Connections** to initiate a connection.
